

## Summer STREAM

### Challenge#4. What did you see today?

**For Parents:** Please encourage your student to spend 40 minutes a day on reading/writing/mathematics. Keep their young minds actively engaged in learning!

**For ALL Students:** What did you see today?

**Step 1:** Go outdoors and find a place to watch nature. Write questions and make observations. Draw a picture!

This is what I saw today:

**Step 2:** Please write down your questions and observations in your journal. Draw pictures, too!

Your observations and questions might include a list like mine:

I saw this flying creature!

Look how big it is!

I asked myself:

Is it a moth or a butterfly?

Why is it here?

What is it doing?

Where did it come from?  
How long will it stay?
